Allowable Subject Matter

1. This office action is in response to the amendment filed on 06/24/05.
2. Claims 1-23 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Upon further consideration and comparison with prior art of record (closest reference, Peterson et al. – US 6,529,631), claims 1-23 are allowed. The present invention relates to method and apparatus for encoding and decoding blocks of data, in which, for at least one of the blocks of data, at least one parameter associated with the at least one block of data is transmitted, the parameter representing the relative importance of the block of data associated with the parameter within a message by all the blocks of data, and in which the data is coded by channel coding method which does not take into account the parameter". Peterson discloses encoding method where image or video is encoded taking into account the perceptual metric, however, such metric is utilized for generating optimal encoded signal at the encoder and not transmitted with the data. Peterson, taken alone or in combination with others, fails to fairly teach the above claimed subject matter in independent claims 1, 2 and similarly in independent claims 6, 7 (claims 3-5, 8-23 depend therefrom). Thus, claims 1-23 are found to be novel and unobvious over prior art of record.
